& Outdoor Spaces

Spanline Australia, innovating since 1985

We have developed a system and technique for the establishment and operation of a network of site based Spanline Franchises and Licensed Builders that specialise in the design, manufacture, supply and installation of building systems and products for use in home improvements including patios, verandahs, carports, shelters, glass and screened enclosures, opening roofs, windows and walling, insulated roofing and decks.

Tony Way,
Spanline Founder & Managing Director

**Spanline was founded with
the vision of changing the way
Australians play. We all love the
outdoor lifestyle and Spanline
makes it easy to enjoy it even more.**

Why Spanline?

When you join the Spanline team, you become a part of a nationwide family. Being a part of our family has many benefits.

Security of a Trusted & Established Brand

The Spanline brand is 35+ years strong and has high recognition in the marketplace. We achieve this through our commitment to customer service combined with national, regional and local marketing programs to ensure Spanline is top of mind and the preferred choice.

Expansive Product Range

The Spanline Building System comprises a variety of products to suit a range of large or small custom projects. The ability to meet and exceed our customers' needs and expectations is key to our success. Our custom engineering and investment in research and development means Spanline products are market leading and built to withstand Australian conditions.

High Growth Industry

Expand your business and increase market reach with a wide range of products available.

Access to Industry Leading Advertising & Strategy

Located at our Byron Bay head office, our marketing experts coordinate national marketing strategies and provide advice and support at a local level. With a focus on digital media complemented by creative TV, radio, and print, they build brand awareness and support cost effective lead generation (additional costs apply).

Franchisor Support

Access to Head Office support, Spanline Built IP branding, Franchisor Marketing and Advertising, and Engineering (additional costs apply).

Build your Business

Be part of a nationally identifiable distribution network and build your business on a strong base of brand credibility.

Getting started with Spanline is easy

STEP 1 Contact us

STEP 2 Let's get to know each other

STEP 3 Learn about your options

STEP 4 Complete the paperwork

STEP 5 Get down to business

Carports, patios & outdoor spaces

The Spanline Building System allows for ultimate design and construction flexibility. Ideally suited for the construction of patio and verandah covers, screen and glass rooms, walkways and carports, our system creates a finished product your customers will love.

Key products

Single Skin Roofing

The Double-U Difference

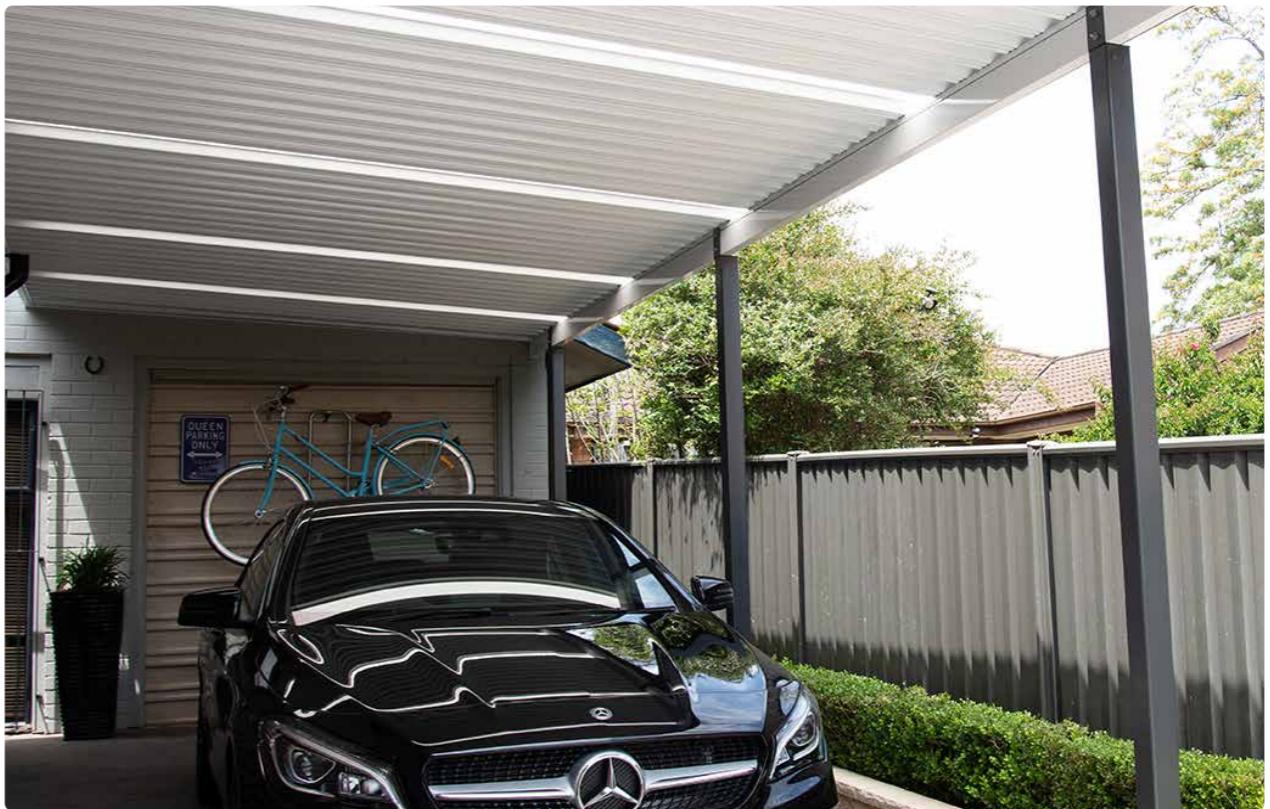

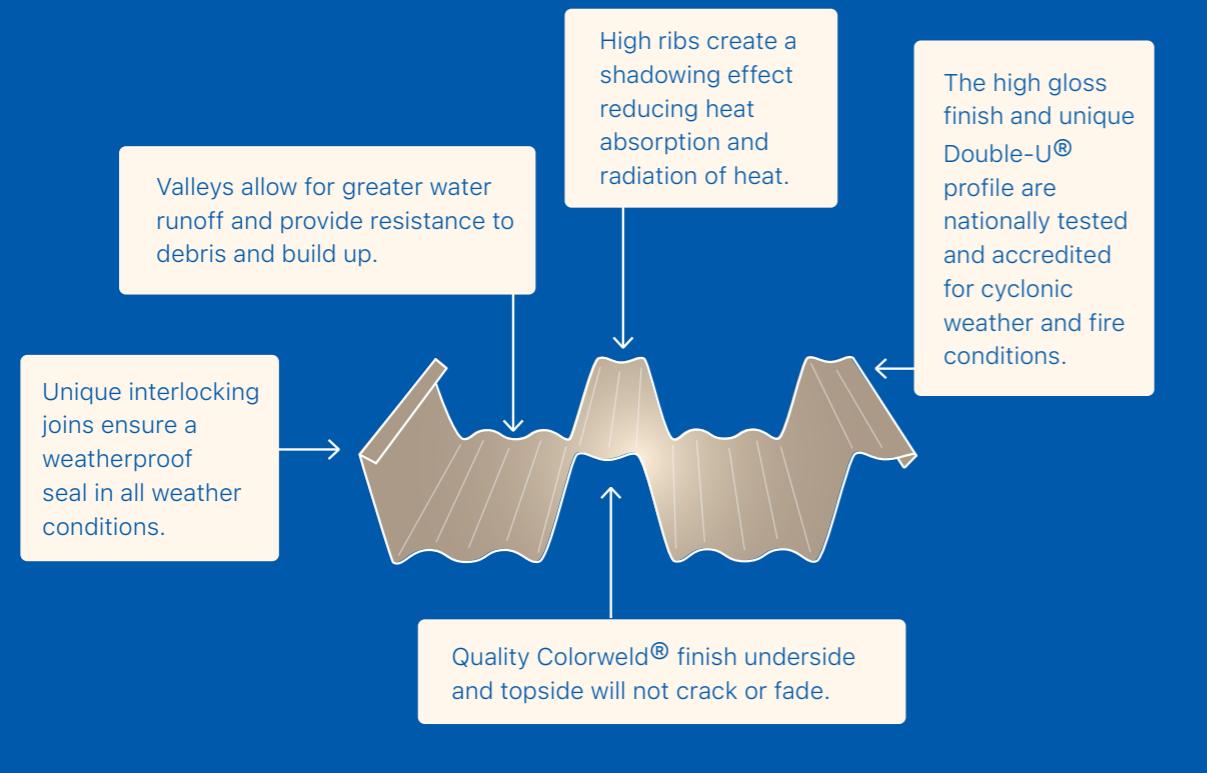

The Double-U® roofing profile is 100% exclusive to Spanline Home Additions. Its unique design makes it the most superior profile on the market today. Double-U® has been extensively tested for cyclonic weather conditions and has gained national accreditation for its outstanding performance and strength. With so many features, benefits and technical advantages it is easy to see that the difference is the Double-U®.

The high tensile Aluzinc coated steel used to produce the Double-U® roof sheet provides more strength and greater span, is weather resistant and cooler in summer, whilst the high quality Colorweld® finish reflects more light into our customers' homes.

- By design, the strongest and most rigid profile in the industry.
- Profile allows for greater water runoff.
- Chemical resistant*.
- Corrosion resistant*.
- Cooler in summer.
- Easy maintenance.
- Unique interlocking joins.
- Technically superior.
- Versatile design options.
- Up to 15 years warranty*.
- Colorweld® paint finish
- Integrates with Spanlites® for extra light.

Single Skin Roofing

Slendek® Slimline Roofing

Slendek® is Spanline's 50mm deep ribbed flat roofing panel. The fully engineered design of the high tensile steel profile makes Slendek® one of the strongest and most durable flat roof profiles on the market.

The modern and lightweight slimline profile of the Slendek® roofing panel complements all styles of homes and allows Spanline to create the perfect space. From a patio or verandah, to a glass or screened room, carport or shelter, the options are endless.

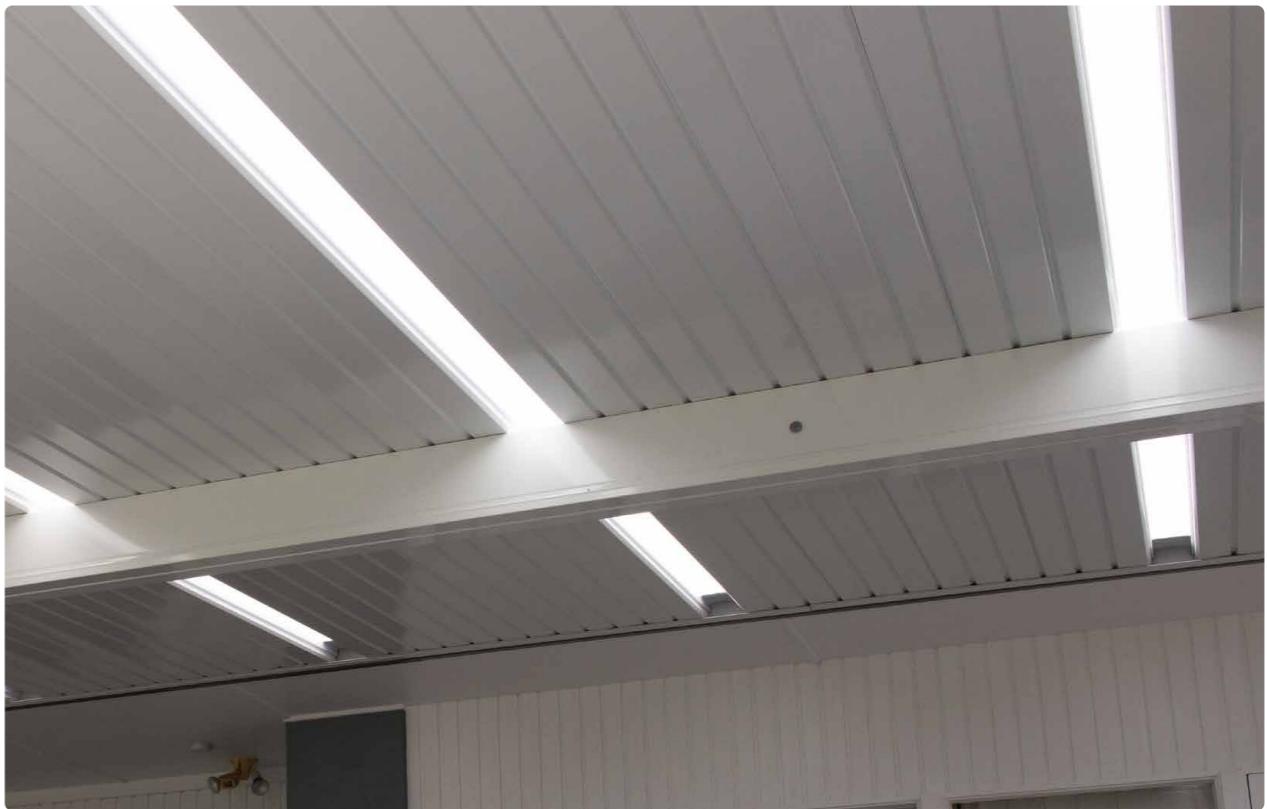

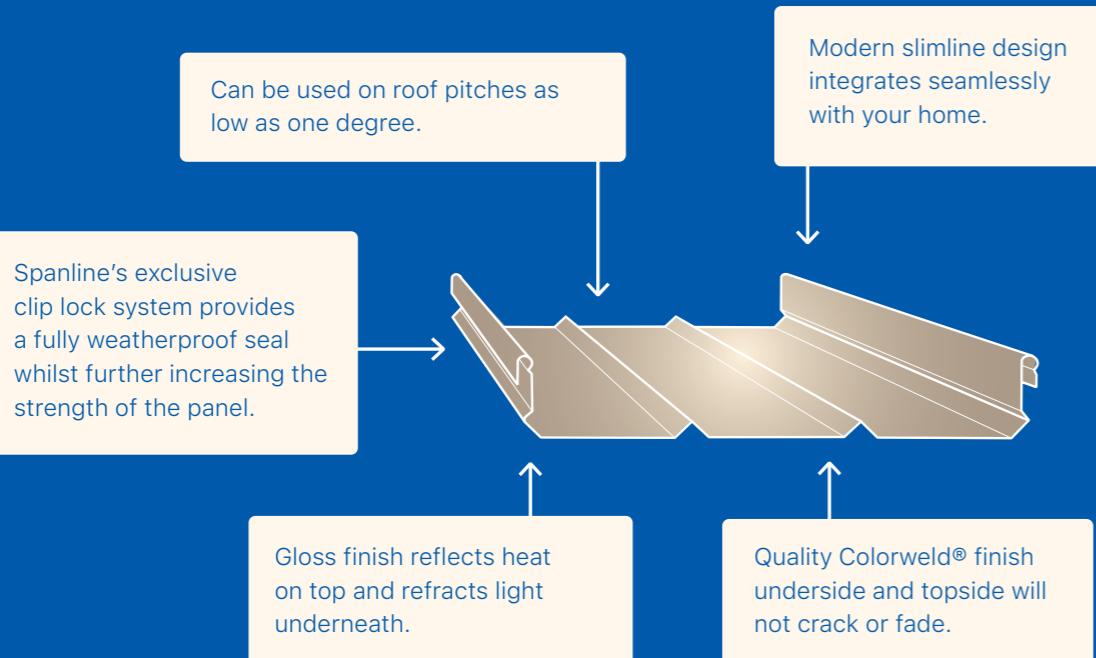

Spanline's completely integrated building system and innovative range of home addition designs, allows us to create the ultimate year-round lifestyle solution.

The Slendek® roofing panel allows for roof pitches as low as one degree, so Spanline designers can create a design to suit everyone's lifestyle. Slendek® can be used in conjunction with our clear UV resistant Spanlites® to allow extra light into the outdoor area.

- Strong and durable flat roof profile.
- Modern slimline appearance.
- Lightweight.
- Exclusive interlocking clip system.
- Fully engineered.
- Attractive design options.
- Easy maintenance.
- Up to 15 years warranty*.
- Colorweld® paint finish
- Integrates with Spanlites® for extra light.

Key products

Ezi Struct® Insulated Roof and Walling Panels

Spanline's Ezi Struct® insulated panels are transforming the way we build and insulate our customers' homes. Our insulated roof and wall panels provide outstanding insulation and are available in a large range of colours and finishes, together with an expanded polystyrene core to suit the desired insulation rating or free span requirement. Our insulated roofing products provide a variety of profiled, weather tight covers, outstanding insulation and a pre-finished maintenance free ceiling.

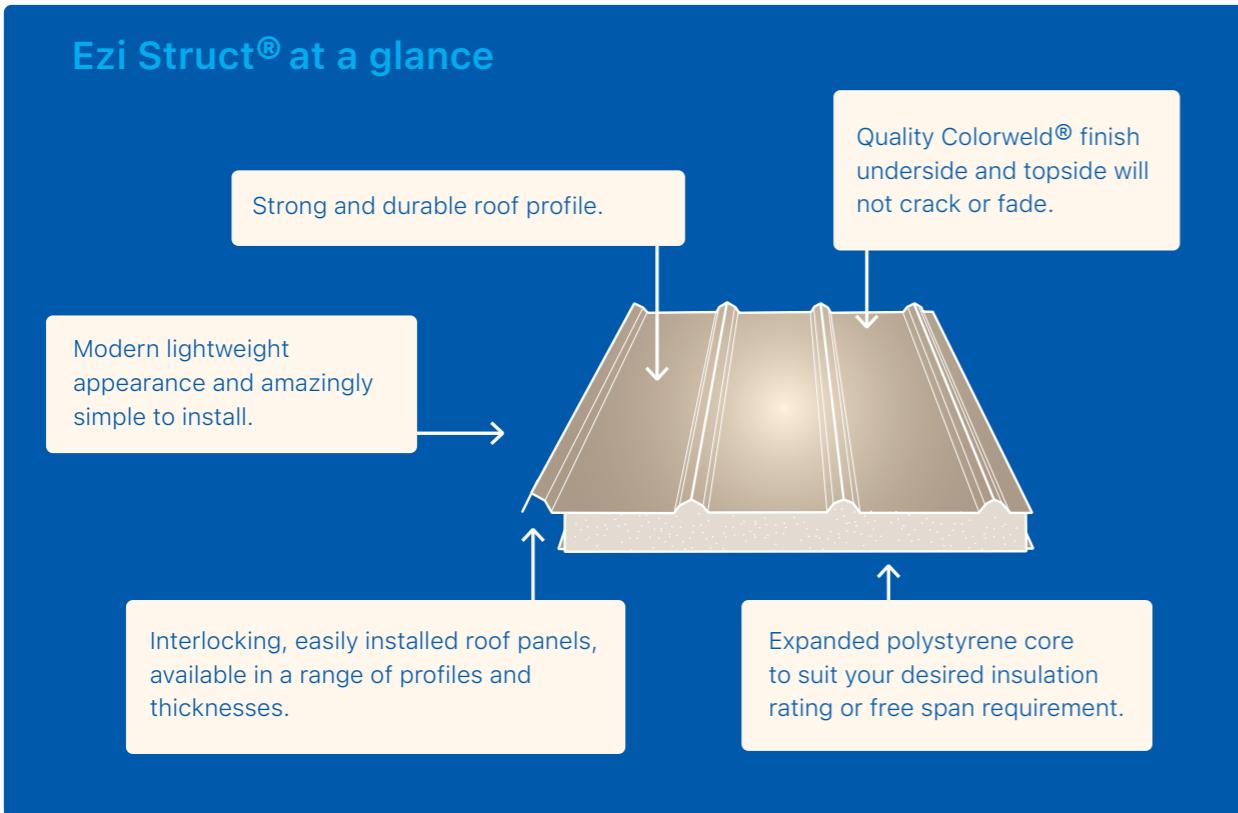

Ezi Struct® will keep an area cool in summer and warm in winter. Interlocking, easily installed roof panels are available in a range of profiles and thicknesses to suit the desired insulation

rating or trafficable free span requirement. Using insulated panels reduces construction times and site debris and they are amazingly simple to install.

Ezi Struct® panels are easily incorporated into all forms of construction and meet the building regulations' insulation requirements. With its sustainability and durability credentials, Ezi Struct® panels are suitable for just about any roofing application.
